

S a f e t y D a t a S h e e t

Company name : TERAOKA SEISAKUSHO CO., LTD.
Address : 1-4-22 Hiromachi, Shinagawa-ku, Tokyo 140-8711, Japan
Department : Quality Assurance Department
Telephone : 03-3491-0837

Issued : October 1, 2012
Revised : May 28, 2019

1. Product name : Combination adhesive tape No.681S

2. Hazards identification

GHS Classification : Not applicable to classification standard(because our product is "Article")
Specific hazards : Nothing particular

3. Composition, information on ingredients

Single material or mixture : Mixture material
Component : Nomex® paper / Acrylic adhesive
Chemical formula, CAS No. : Not identifiable, because of mixture of several materials
Pollutant Release and Transfer Register Laws (in Japan)
Class 1 Designated Chemical Substances : Antimony trioxide CAS No.1309-64-4
Class 2 Designated Chemical Substances : Not contained

4. Emergency measures

If entered into eyes : Wash with clean running water and consult the doctor.
If affixed to the skin : It is recommended to peel off slowly and then wash with soap and water.
If swallowed : Consult the doctor immediately.

5. Measures against fire

Extinguishing method : According to the common method.
Extinguisher : Water, general use fire extinguisher (powder, bubble, carbonic acid gas)
(Since poisonous gas may break out while burning, care must be taken not to breathe the gas)

6. Measures against leakage

No leakage.

7. Precautions in handling and storage

Handling : Neither there is danger nor harmfulness, except that the tape is heavy weight.
Storage : Avoid direct sunlight, high temperature and humidity.

8. Exposure controls, personal protection

Density to be controlled : Not specified.
Tolerance of density : For Japan Industry Hygienic Institute ... Not specified.
For ACGIH ... Not specified.
Equipment to be provided : Generally not necessary.
Protective tool : Not necessary.

9. Physical and chemical properties

Appearance : Rolled Boiling point, Melting point : Unknown
Volatility : None Solubility(water) : Not soluble

Nomex® is a DuPont registered trademark.

10. Stability and reactivity

Stability : Stable under normal condition
Condition to avoid : No data
Hazardous decomposition products : No data

11. Information about harmfulness (including examples of symptoms for human, epidemiologic information)

Corrosiveness of the skin : No data
Stimulation on the skin : If keeping the skin affixed for a long time, person having a delicate skin or allergy may come out in a rash.
Skin sensitization : No data
Acute virulence(LD₅₀), Sub-acute virulence, Chronic virulence : No data
Possibility of cancer, Reproduction virulence, Possibility of deformity : No data
Possibility of variation (aberration of microbe, chromosome): No data
Others (occurrence of toxic gas by reacting with water, etc.) : No data

12. Information about effect on environment

Resolvability, Accumulation, Toxicity of fish : No data
Others : No data

13. Precautions in disposal

The tape is disposed of according to “Law of disposal of waste and cleaning” .
However, since this product includes halogenated compound, it is to take care of the corrosion of incinerator, the air pollution, and so on.

14. Precautions in transportation

Nothing particular. However, in order to keep the product quality, avoid high temperature and humidity and excessive impact.

15. Applicable rules

Law of disposal of waste and cleaning
Pollutant Release and Transfer Register Laws (in Japan)

16. Other information
