Company name : TERAOKA SEISAKUSHO CO., LTD.  
Address : 1-4-22 Hiromachi, Shinagawa-ku, Tokyo 140-8711, Japan  
Department : Quality Assurance Department  
Telephone : 03-3491-0837

Issued : October 1, 2012  
Revised : April 26, 2019

---

**1. Product name :** Copper foil adhesive tape No.831S

---

## **2. Hazards identification**

GHS Classification : Not applicable to classification standard(because our product is "Article")  
Specific hazards : Nothing particular

---

## **3. Composition, information on ingredients**

Single material or mixture : Mixture material  
Component : Copper foil / Acrylic adhesive / Release liner  
Chemical formula, CAS No. : Not identifiable, because of mixture of several materials  
Pollutant Release and Transfer Register Laws (in Japan)  
Class 1 Designated Chemical Substances : Not contained  
Class 2 Designated Chemical Substances : Not contained

---

## **4. Emergency measures**

If entered into eyes : Wash with clean running water and consult the doctor.  
If affixed to the skin : It is recommended to peel off slowly and then wash with soap and water.  
If swallowed : Consult the doctor immediately.

---

## **5. Measures against fire**

Extinguishing method : According to the common method.  
Extinguisher : Water, general use fire extinguisher (powder, bubble, carbonic acid gas)

---

## **6. Measures against leakage**

No leakage.

---

## **7. Precautions in handling and storage**

Handling : Wearing protective gloves is recommended because of the possibility of cutting hands with the edge of the tape.  
Storage : Avoid direct sunlight, high temperature and humidity.

---

## **8. Exposure controls, personal protection**

Density to be controlled : Not specified.  
Tolerance of density : For Japan Industry Hygienic Institute ... Not specified.  
For ACGIH ... Not specified.  
Equipment to be provided : Generally not necessary.  
Protective tool : It is recommended to wear the protective gloves.

---

## **9. Physical and chemical properties**

Appearance : Rolled                      Boiling point, Melting point : Unknown  
Volatility : None                          Solubility(water) : Not soluble

---

---

#### 10. Stability and reactivity

Stability : Stable under normal condition  
Condition to avoid : No data  
Hazardous decomposition products : No data

---

#### 11. Information about harmfulness (including examples of symptoms for human, epidemiologic information)

Corrosiveness of the skin : No data  
Stimulation on the skin : If keeping the skin affixed for a long time, person having a delicate skin or allergy may come out in a rash.  
Skin sensitization : No data  
Acute virulence(LD<sub>50</sub>), Sub-acute virulence, Chronic virulence : No data  
Possibility of cancer, Reproduction virulence, Possibility of deformity : No data  
Possibility of variation (aberration of microbe, chromosome): No data  
Others (occurrence of toxic gas by reacting with water, etc.) : No data

---

#### 12. Information about effect on environment

Resolvability, Accumulation, Toxicity of fish : No data  
Others : No data

---

#### 13. Precautions in disposal

The tape is disposed of according to "Law of disposal of waste and cleaning" .

---

#### 14. Precautions in transportation

Nothing particular. However, in order to keep the product quality, avoid high temperature and humidity and excessive impact.

---

#### 15. Applicable rules

Law of disposal of waste and cleaning

---

#### 16. Other information
