

S a f e t y D a t a S h e e t

Company name : TERAOKA SEISAKUSHO CO., LTD.
Address : 1-4-22 Hiromachi, Shinagawa-ku, Tokyo 140-8711, Japan
Department : Quality Assurance Department
Telephone : 03-3491-0837

Issued : October 1, 2012
Revised : March 20, 2019

1. Product name : Copper foil conductive adhesive tape No.8323

2. Hazards identification

GHS Classification : Not applicable to classification standard(because our product is "Article")
Specific hazards : Nothing particular

3. Composition, information on ingredients

Single material or mixture : Mixture material
Component : Copper foil / Acrylic adhesive / Release liner
Chemical formula, CAS No. : Not identifiable, because of mixture of several materials
Pollutant Release and Transfer Register Laws (in Japan)
Class 1 Designated Chemical Substances : Nickel CAS No.7440-02-0
Class 2 Designated Chemical Substances : Not contained

4. Emergency measures

If entered into eyes : Wash with clean running water and consult the doctor.
If affixed to the skin : It is recommended to peel off slowly and then wash with soap and water.
If swallowed : Consult the doctor immediately.

5. Measures against fire

Extinguishing method : According to the common method.
Extinguisher : Water, general use fire extinguisher (powder, bubble, carbonic acid gas)

6. Measures against leakage

No leakage.

7. Precautions in handling and storage

Handling : Wearing protective gloves is recommended because of the possibility of cutting hands with the edge of the tape.
Storage : Avoid direct sunlight, high temperature and humidity.

8. Exposure controls, personal protection

Density to be controlled : Not specified.
Tolerance of density : For Japan Industry Hygienic Institute ... Not specified.
For ACGIH ... Not specified.
Equipment to be provided : Generally not necessary.
Protective tool : It is recommended to wear the protective gloves.

9. Physical and chemical properties

Appearance : Rolled Boiling point, Melting point : Unknown
Volatility : None Solubility(water) : Not soluble

10. Stability and reactivity

Stability : Stable under normal condition
Condition to avoid : No data
Hazardous decomposition products : No data

11. Information about harmfulness (including examples of symptoms for human, epidemiologic information)

Corrosiveness of the skin : No data
Stimulation on the skin : If keeping the skin affixed for a long time, person having a delicate skin or allergy may come out in a rash.
Skin sensitization : No data
Acute virulence(LD₅₀), Sub-acute virulence, Chronic virulence : No data
Possibility of cancer, Reproduction virulence, Possibility of deformity : No data
Possibility of variation (aberration of microbe, chromosome): No data
Others (occurrence of toxic gas by reacting with water, etc.) : No data

12. Information about effect on environment

Resolvability, Accumulation, Toxicity of fish : No data
Others : No data

13. Precautions in disposal

The tape is disposed of according to "Law of disposal of waste and cleaning" .

14. Precautions in transportation

Nothing particular. However, in order to keep the product quality, avoid high temperature and humidity and excessive impact.

15. Applicable rules

Law of disposal of waste and cleaning
Pollutant Release and Transfer Register Laws (in Japan)

16. Other information

Reference : None

Handling the contents described

- (1)The contents described in this sheet are prepared according to the information and so on that we have at present, so they may be revised according to new information.
Precautions are provided with assumption of normal handlings. When they are used with special handlings, safety measures to the usage must be considered.
- (2)Care must be taken to the handling because this evaluation of danger and harmfulness is not necessarily sufficient.
